WHAT WE PROPOSE

- **Strategic Consulting and Process Optimization**

- **Comprehensive Support Services**

- **Custom DevOps Solutions for Niche Markets**

- **Automation and CI/CD Implementation**

- **Technical Integration and Vendor Collaboration**

- **Disaster Recovery and DDoS Mitigation**

- **Monitoring, Security, and Compliance**

- **Database Optimization and Migration**

- **Building a Dedicated Team for your purposes**

- **High-Performance Computing (HPC) Solutions**

- **Infrastructure Resilience and Scalability**

- **Cloud Infrastructure Design and Optimization**

OUR KEY PROJECTS

- Business processes optimization
- Data-driven decisions
- High-Performance Computing for AI Services
- Affiliate Marketing Platform Enhancements

- E-Commerce and Retail Optimization
- AI-Powered Applications for Consumer Engagement
- Game Development Studio Infrastructure
- Educational Technology Solutions

DATA-DRIVEN GROWTH, AI-POWERED PRECISION

Developed a scalable Telegram bot with AI-driven content recommendations, dynamic subscriptions, targeted ads, and advanced analytics. Integrated database for efficient content management, boosting engagement and monetization

AI-POWERED APPLICATIONS FOR CONSUMER ENGAGEMENT

Developed AI-powered apps, including a companion and dating platform, with ML-driven matchmaking and automated infrastructure for performance, privacy, and scalability

INFRASTRUCTURE OPTIMIZATION FOR CRYPTO AND BLOCKCHAIN PROJECTS

Built scalable infrastructure for a crypto accelerator and Layer 1 blockchain, cutting costs by 60% and enabling 24–48h project launches. Delivered a blockchain MVP in 3 weeks, securing customers at a major Singapore event

EDUCATIONAL TECHNOLOGY SOLUTIONS

Modernized EdTech infrastructure, automating workflows and migrating databases from Oracle to PostgreSQL, saving \$4–6M annually. Built cloud-native environments for real-time content and analytics, boosting efficiency and innovation

HIGH-PERFORMANCE COMPUTING FOR AI SERVICES

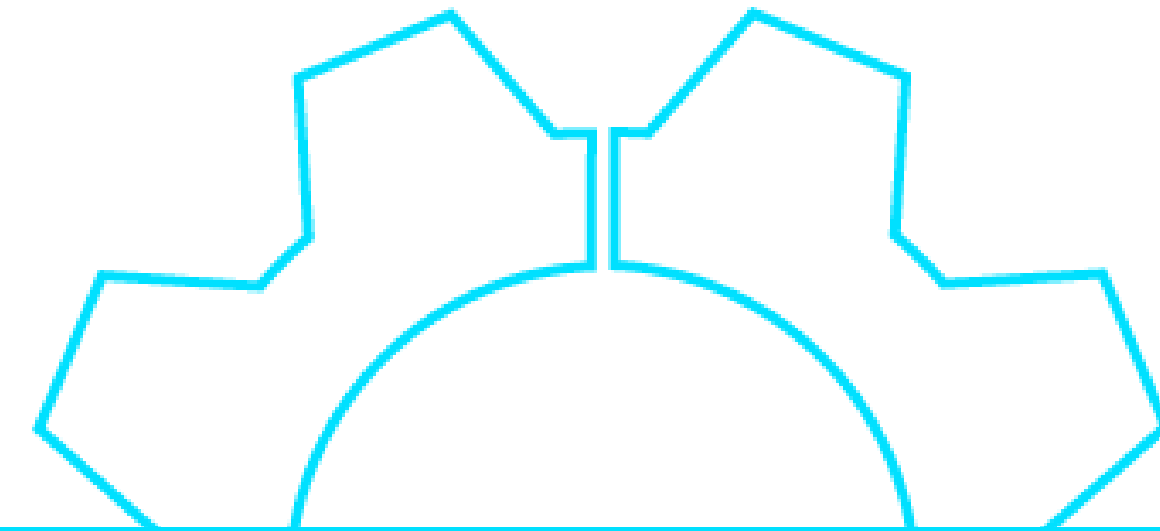

Repurposed 60,000 unused GPUs for AI research, turning idle resources into a \$42M reinvestment. Provided HPC power to EU universities and startups, driving innovation

E-COMMERCE AND RETAIL OPTIMIZATION

Migrated a major supermarket's e-commerce platform to AWS, boosting scalability and cutting costs by \$6M annually. Optimized resources and automated operations for a better customer experience.

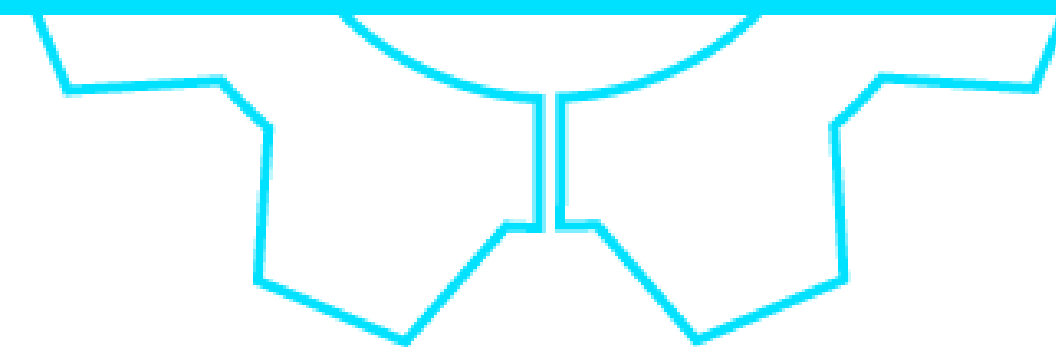

AFFILIATE MARKETING PLATFORM ENHANCEMENTS

Optimized deployment pipelines, cut deployment times, and mitigated DDoS attacks for platform stability. Automated operations and enhanced customer engagement, driving sales in affiliate marketing

GAME DEVELOPMENT STUDIO INFRASTRUCTURE

Built low-latency server infrastructure for a multiplayer game, ensuring seamless global performance. Automated builds to accelerate development and enhance game quality
